

Sharing is Caring

Open Science Initiatives

Presented by Andy R. Terrel
Scientific Software Days 2012

© The University of Texas at Austin, 2012
Please see the final slide for Copyright and licensing information

Outline

- Why I support sharing code.
- Sharing code and the economy (both financial and academic)
- Efforts to build a sharing community

Lost Arts

“In truth use is no longer made of it because in neither apartments nor even churches do people want anything that might diminish the light. “

King's Buildings superintendent Charles Nicholas Cochin in 1764 on the petition of Jean-Adolph Dannecker, a gingerbread baker in Strasbourg, to reestablish the stained glass craft.

Oldroyd-B Fluids

$$\nabla \cdot \mathbf{u} = 0,$$

$$\nabla \cdot \mathbf{T} = \mathbf{f}$$

$$\mathbf{T} \equiv l\rho + 2\eta\mathbf{D} + \boldsymbol{\tau},$$

$$\mathbf{D} \equiv \frac{1}{2}(\nabla\mathbf{u} + \nabla\mathbf{u}^T)$$

Oldroyd-B fluids

- Kawahara Takeuchi 1977 paper on first FEM paper for the Oldroyd-B fluid model
- Andy in his office in 2006 struggled for 6 months to understand why his code didn't work.
- Papers in 1985, 1991 refuting the paper's results

Other People's Writing

Balance shift in modality of scientific discovery

NITRD Symposium, 16 Feb 2012

David Keyes at NITRD (<http://cra.org/ccc/nitrdsymposium-keyes.php>)

(dates are somewhat symbolic)

1686

scientific models

1947

numerical algorithms

1976

computer architecture

1992

scientific software engineering

“Computational science is undergoing a phase transition.”

David Keyes at NITRD (<http://cra.org/ccc/nitrdsymposium-keyes.php>)

THE UNIVERSITY OF TEXAS AT AUSTIN
Texas Advanced Computing Center

Outline

- Why I support sharing code.
- Sharing code and the economy (both financial and academic)
- Efforts to build a sharing community

NumFOCUS

- Sponsor sprints and conferences
- Provide scholarships and grants
- Provide hardware grants for student developers
- Pay for the creation of publicly-available documentation and basic course development
- Work with domain-specific organizations
- Raise funds from industries using Python and NumPy

<http://numfocus.org>

Open Science Foundation

We are open source computer scientists, citizen scientists, and scientist-scientists, science writers, journalists, and educators, makers of and advocates for Open Data, Open Access, and Open Source. Our mission is in short: to open science.

Run My Code

1. A researcher has an idea.
2. The researcher writes a paper based on this idea.
3. Using RunMyCode, the researcher creates a companion website associated with this paper. The companion website allows people to implement the methodology presented in the paper.

<http://www.runmycode.org/>

Tools

- Github (<https://github.com/>)
- Bitbucket (<https://bitbucket.org/>)

- Figshare
- Travis CI

- Building software BIG PROBLEM!
 - NumFOCUS Discussion (<https://groups.google.com/d/topic/numfocus/rtG7VkGFVMw/discussion>)
 - Third Bit blog (<http://third-bit.com/blog/archives/4555.html>)
